

FOR SALE
BRAND NEW
TX4 EURO 6 LPG

FROM
£30k
OTR

Featuring the latest 3rd
Generation System

GEN3

VRS
Vehicle Repowering Solutions

LIMITED EDITION

A unique opportunity to own one of 80 brand new, Euro 6, LPG TX4's

An LTC Euro 5 chassis, fitted with a new 2.0ltr turbo engine from General Motors, specifically adapted to operate on LPG.

The cabs are newly registered with the DVLA. For example, a cab sold in June 2021 has a ##21 registration number, with 'date of first registration' recorded as 01/07/2021 in the V5C logbook.

Clean Air Zone (CAZ) / Low Emission Zone (LEZ) compliant, significantly reducing some of the most health-harming pollutants by up to 99%.

Fully certified by the Clean Vehicle Retrofit Accreditation Scheme (CVRAS).

Cleaner

Compared to their diesel counterparts, the TX4 LPG produces up to 99% less Particulate Matter (PM) and 80% less Nitrogen Oxides (NOx), known to cause major illnesses such as heart disease, stroke and cancer.

Tried & Tested Technology

Our technology has been implemented since 2017, in retrofits to hundreds of existing TX2 and TX4 models.

All of the new cabs feature our latest, 3rd generation system, which was launched in June 2021, further enhancing performance and capabilities.

Reduced Running Costs

The average price of LPG is around 66 pence per litre vs £1.36 per litre for diesel. It is around 20-30% cheaper to run than the equivalent diesel model.

In addition, there are no extra costs for additives such as AdBlue as this is not required.

Improved drive

The LPG engine is much quieter and smoother with no compromise on power or performance. This makes the ride more comfortable for the driver and passengers.

Quick and Easy Refuelling

It takes just a few minutes to fill the 80ltr LPG tank from empty, minimising the amount of lost time between jobs.

No Range Anxiety

Depending on driving conditions, a full tank of LPG will give a range of 240-400 miles. There's also a 12ltr reserve petrol tank.

Note: fuel consumption and range has been improved with our 3rd generation system (awaiting official figures).

CAZ/LEZ Compliant

Our Euro 6 engine means that the cab is compliant in Clean Air Zones and Low Emission Zones.

SPECIFICATIONS

ENGINE	General Motors	FUEL TYPE	LPG / Petrol
SIZE	1998	TANK CAPACITY	80ltr LPG/15ltr Petrol
CYLINDERS	4 (Inline)	RANGE**	240-400 Urban/E-U
ASPIRATION	Turbo charged	PM	0.0016 gr/km
POWER	110bhp	NOx	0.033 gr/km
GEARBOX	Automatic	CO₂	222 gr/km

FEATURES: Rear parking sensors, front fog lights, remote central locking, tinted windows, Kenwood DAB stereo, Bluetooth connectivity.

*** 2nd generation figures quoted. Real world road tests have yet to be completed for the official fuel consumption and range figures for our 3rd generation system, however, fuel economy and range are both enhanced.*

1ST GENERATION In 2017, 65 cabs were converted in Birmingham as part of a National Trial.

2ND GENERATION Following the successful trial, the product was upgraded for a national rollout.

The engine was rebuilt by hand, with the installation of dedicated LPG valve seats for lifetime durability.

GEN3

3RD GENERATION

In June 2021, we launched our 3rd generation system with major enhancements to the LPG system, software and performance.

Benefits include an improved fuel economy (LPG & Petrol), even quieter and smoother drive, greater throttle response, new radiator (no cap), reduced engine temperature (by 10°C), widely available servicing components, full EOBD diagnostic plug in for system access (e.g. AA/RAC).

LIMITED TIME SALES EVENT

21 Plates @ £30,000 INC. VAT
71 Plates @ £35,000 INC. VAT
(list price: £39,999 inc VAT)

Includes delivery, full tank of fuel, 1st year vehicle tax and 2yr/80,000 mile warranty (whichever comes sooner).

The first year vehicle tax, which is included in the sales price is £1,345. From the second year onwards, the vehicle tax is just £145 per year.

Reserve now with a £2,000 deposit.
